MINI 2-DAY HACKATHON

In randomized groups, you will create an application displaying the Javascript/HTML/CSS skills you have developed so far.

Your application should implement some JS aspects such as events, arrays, objects, conditional statements/switch, loops, etc.

You have until Thursday afternoon, so be creative, work out all the logic beforehand, and <u>simplify where you can</u>. Make sure to delegate tasks between your group members.

SOME IDEAS TO JUMPSTART YOUR BRAINSTORMING

E-Commerce (shopping cart front end)
Finance (tip calculator, savings calculator)
Productivity (To-do list, unit conversion calculator, random name picker)
Games(charades/quiz, madlibs, rock paper scissors)
